

**We Provide The
World With Power**

TritonPower.com

Tier 4 Final

- » Designed and Engineered to power a variety of projects and environments
- » Tier 4 Final for use in The United States (Including California) and Canada
- » Standard and Full Rental packages available
- » Customizable configurations for any market
- » 15 to 1500 kVA Generator Packages Available
- » UL, CSA Certifications Available
- » Most Models In Stock for Immediate Delivery

MOBILE GENERATORS

EPA Certified

Fuel Options

Diesel

Natural Gas / LP

- » Designed to power any application including hospitals, data centers, gas stations, manufacturing and more.
- » Emergency Stationary Emission-Certified
- » Tough Industry Testing and Quality Control
- » Single generators from 10 to 2500 kW
- » Paralleling options to over 10 MW
- » Certifications Available: UL2200, CSA, NEMA, ISO

- » Fully Sound Attenuated Enclosures from 68 db with options for Aluminum and Container Packages
- » Industrial Engines including Cummins, John Deere, Perkins, Volvo and more
- » Open-Source Equipment allows easy repair and replacement of all components
- » Fuel Tanks, Transfer Switches and full range of accessories.
- » Maintain a full stock for quick delivery

STATIONARY GENERATORS

- » Designed for the International Market including EU and non-certified emissions
- » Available in both 50 and 60 hz configurations
- » International/Worldwide Warranty and service on all components
- » Available Options Include: Anti-Corrosion, Harsh Environments, Low and High Temp, High Altitude and other packages
- » Available in Open, Sound Attenuated, Aluminum and Containerized configurations
- » Full Stock of Generators and Accessories including Trailers, Large Capacity Fuel Tanks, Transfer Switches, and more

Fuel Options

Diesel

Natural Gas / LP

TritonPower.com

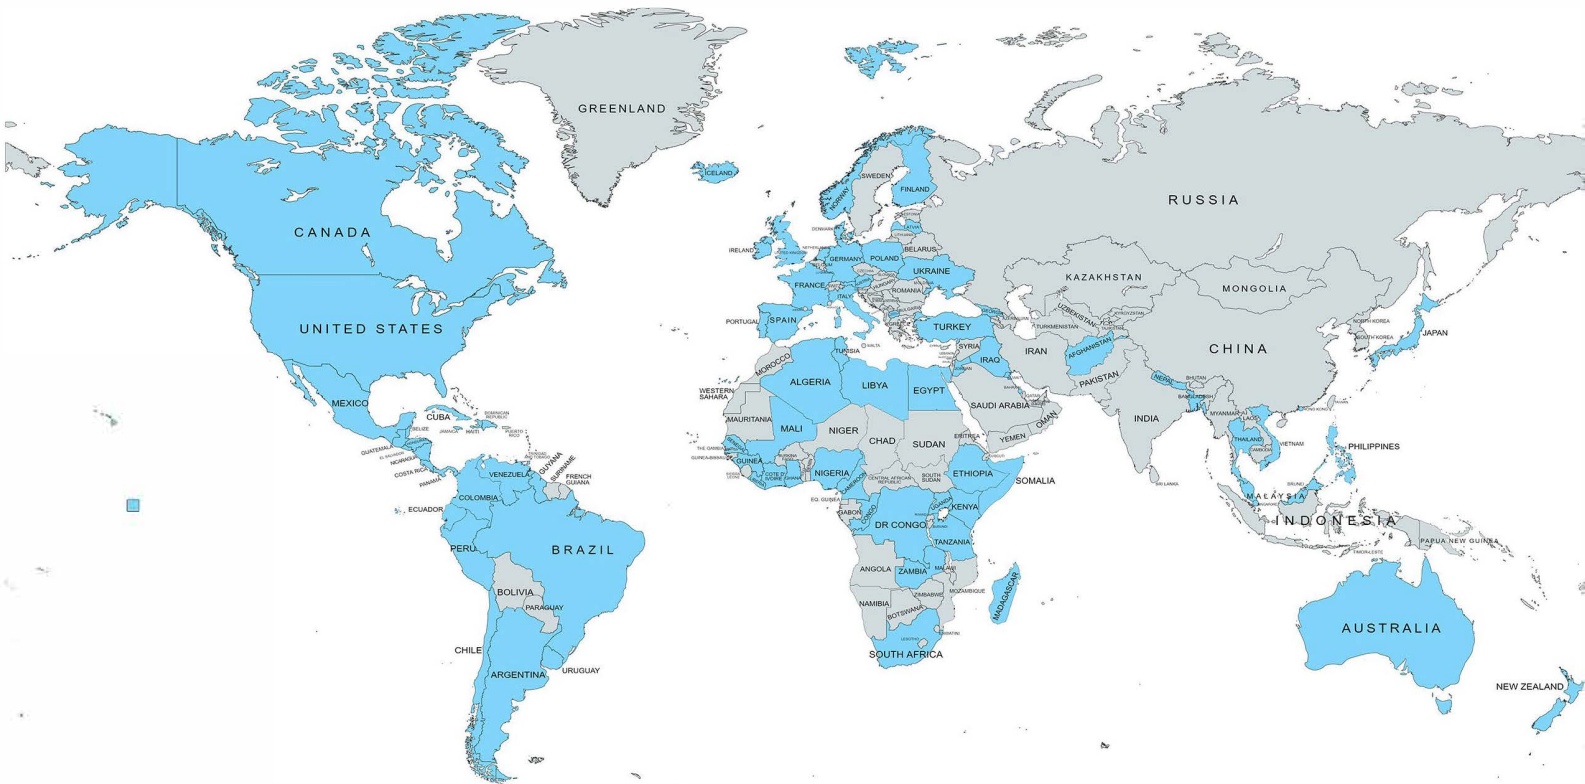

CUSTOM BUILT

- » Triton Power and our engineering team can custom design equipment for your unique needs
- » Harsh Weather Packages including high altitude, cold and high temp, desert locations, corrosive environment and more
- » Custom Military Applications
- » Enclosures can be nearly any color paint
- » Aluminum and Stainless-Steel Enclosure
- » Solar Options, Pump Systems, and Refer packages
- » Paralleling for nearly every generator we manufacture
- » Hurricane Rated and Containerized Packages
- » Custom Trailers, Fuel Tanks, Transfer Switches
- » Any type of connections including cam-locks, refer plugs, distro panels, and breaker configurations

TRITON IN ACTION

The Simons Observatory in Chile

The Simons Observatory is located in the high Atacama Desert in Northern Chile inside the Chajnator Science Preserve, at an altitude of 5,200 meters (17,000 ft). Triton Power customized and installed 6 generators for a total power output of 2,000 kW. These units are being used to power the observatory's array, housing and the cooling systems.

Oil Platform in Aruba

Triton Power manufactured and fully customized a synchronized array of two generators for a total 1500 kW for three oil platforms. These units are currently being utilized to power the auxiliary propulsion system of an oil drilling platform located off the Aruban shores.

ABOUT US

For over 25 years, Triton Power has been at the forefront of the commercial and industrial generator industry. Triton Power manufactures and distributes a wide range of diesel and gaseous generators for nearly every application. We offer a full line of products designed for mobile, stationary, and export including Transfer Switches, Fuel Tanks, Trailers, and other accessories.
